PROFESSIONAL EXPERIENCE

Royal Bank of Canada (RBC) — Senior Front-End Developer
Dec 2024 – Oct 2026

- **Full-Stack AI Development:** Developed multiple high-impact platforms (Commercial Underwriting Assistant integrating six AI agents, LLM Onboarding portal, and AI Meeting web apps) using Angular, React, Vue.js, TypeScript, Python, FastAPI, Pydantic, and PostgreSQL/MongoDB.
- **AI Integration & Architecture:** Contributed to architectural decisions for integrating AI agents into web applications, shaping technical execution and optimizing user-AI interactions.
- **Backend Reliability:** Implemented a PgQueuer-based job queue to handle retries for failed document uploads and report generation, incorporating structured logging to enhance error tracking and troubleshooting.
- **Productivity & Automation:** Automated document collection and meeting workflows to reduce manual note taking by 50%, cut document collection timelines from 4 weeks to 2, and save advisors 15 hours per week.
- **Engineering Leadership:** Onboarded and mentored co-op students and new team members, provided full-stack guidance across projects, and participated in co-op technical interviews.
- **Deployment & Infrastructure:** Deployed applications across development, UAT, and production environments, maintaining GitHub Actions pipelines, Docker, and Red Hat OpenShift.

Leon's Furniture Limited Group — Web Developer
May 2022 – Nov 2024

- **Optimized Checkout & Conversions:** Increased customer purchases by 15% and conversion rates by 22% by designing and optimizing a sales checkout web application using JavaScript, Vue.js, and Node.js.
- **Scaled Web Traffic & Architecture:** Developed 91+ dynamic, responsive pages across Shopify, WordPress, and React, driving a 30% increase in overall site traffic.
- **Built Internal Systems & Trained Staff:** Led a team to build a proprietary CRM system optimizing internal sales processes, and trained thousands of employees on internal web functions.

TK Events — Web Developer
Jan 2021 – Apr 2022

- **Delivered Client Front-End Solutions:** Developed enterprise front-end applications using JavaScript, CSS, and HTML for clients including Dell and BMO, integrating gamification features that boosted engagement by 18%.
- **Drove High-Volume Sales & Events:** Delivered 25+ online virtual events annually, driving $2,000,000 in yearly revenue through robust, thoroughly tested web applications.

Essnce — Web Developer
Jul 2020 – Nov 2020

- **Launched E-Commerce & Mobile Platforms:** Built Essnce's e-commerce platform from scratch using JavaScript, Shopify, Liquid, and CSS to establish revenue streams and increase mobile sales by 32%.
- **Engineered High-Performance Code:** Refactored legacy codebases and optimized feature performance to increase overall site speed by 45%.
