EMILY CHOW

FULL-STACK DEVELOPER | AI SOLUTIONS

Email: emilykchow@outlook.com **Location**: Toronto, ON
Portfolio: emilychow.dev **GitHub**: github.com/emilykchow **LinkedIn**: linkedin.com/in/echowk

SUMMARY

Full-Stack Developer with 6+ years of experience building scalable web applications, AI-powered solutions, and high-performance systems using React, Angular, Vue, TypeScript, Python, and Node.js. Proven track record of driving business impact through application architecture, workflow automation, performance optimization, and cross-functional technical leadership.

PROFESSIONAL EXPERIENCE

Royal Bank of Canada (RBC) — **Senior Front-End Developer** Dec 2024 – Oct 2026

- Architected and built full stack, AI-powered applications across commercial banking workflows, integrating 6 specialized AI agents using React, Angular, Vue, Python, FastAPI, PostgreSQL, and MongoDB
- Implemented asynchronous job processing using PgQueuer, including retry handling and structured logging to improve the reliability of document uploads and report generation.
- Developed AI-enabled meeting and document workflows that reduced manual notetaking by 50%, cut document collection timelines from 4 weeks to 2, and saved advisors 15 hours per week.
- Deployed applications across development, UAT, and production environments using Docker, GitHub Actions, and Red Hat OpenShift, supporting consistent and reliable delivery across environments.
- Mentored co-op students and new team members, providing full-stack technical guidance and supporting implementation and problem-solving across multiple projects.

Leon's Furniture Limited Group — **Web Developer** May 2022 – Nov 2024

- Built 91 dynamic pages and optimized sales checkout flows using JavaScript, React, Shopify, Liquid, and SCSS, driving a 30% increase in site traffic.
- Led a team of 3 developers, balancing project management with hands-on development to create a custom CRM that made internal sales workflows more efficient.
- Managed stakeholder requirements and trained thousands of employees on internal web tools.

TK Events — **Web Developer** Jan 2021 – Apr 2022

- Developed enterprise front-end applications using JavaScript, CSS, and HTML for clients including Dell and BMO, integrating gamification features that boosted engagement by 18%.
- Delivered 25+ online virtual events annually, driving $2,000,000 in yearly revenue through robust, thoroughly tested web applications.

Essnce — **Web Developer** Jul 2020 – Nov 2020

- Built Essnce's e-commerce platform from scratch using JavaScript, Shopify, Liquid, and CSS to establish revenue streams and increase mobile sales by 32%.
- Refactored legacy codebases and optimized feature performance to increase overall site speed by 45%.

EDUCATION

General Assembly — **Software Engineering Immersive** Nov 2019 – Feb 2020

Wilfrid Laurier University — **Studies in Computer Science** Sept 2012 – June 2016

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React, Angular, Vue.js, Redux, NgRx, Pinia

Backend: Node.js, Express.js, FastAPI, SQLAlchemy, Pydantic

Databases: PostgreSQL, MongoDB

DevOps & CI/CD: Docker, GitHub Actions, CI/CD, Red Hat OpenShift

AI & Automation: LLM integrations, AI Agents and AI-powered workflows
